

Definition:

mean: The average of a set of data.

average: El promedio de un conjunto de datos.

Looks Like:

mean

Examples:

{2, 3, 7, 11, 12}

Notice the example used also has "7" as the "median"!

$$\text{mean} = \frac{2+3+7+11+12}{5} = \frac{35}{5} = 7$$

Non-examples:
